Know things precisely!

Project-White papers

At Geosys we primarily estimate the importance and utility of any project for which it was originally conceptualised and ensure that the product we deliver betters those expectations.

Since inception GEOSYS has been doing Major projects like:

- Rapid Environmental Impact Assessment

- Geodatabase generation for the prospecting of potential Mineral deposits

- Web GIS Application Development for Tourism

- Interactive Educational Software Development

- Real Estate Management System

- Vehicle Tracking Systems integration

- Decision Support and Expert Systems

- Thematic Mapping for Natural Resources
